- (1) Fishing continues to be good in numbers despite very low waters.**
- (2) The water level at the mouth of these Rio Negro tributaries are just coming out of the jungle; however, we are hopping that at the head waters (lower fishing pressure areas) the water levels might be lower.**
- (3) Good results in terms of big fish despite water levels are a bit high**
- (4) Miraculously we were able to cross over the Unini waterfalls with the Amazon Angel Yacht just before water levels dropped! It is now in deep navigable waters and yet in a low fishing pressure area. Miracle!**
