- (1) The fish are not large because headwaters water levels are still high and we are forced to fish the mouth where there is, as always, excessive fishing pressure
- (2) This was our first 26 lbs. pounder for the season. Miraculously we were able to cross over the Unini waterfalls with the Amazon Angel Yacht just before water levels dropped! It is now in deep navigable waters and yet in a low fishing pressure area. Miracle!
- (3) Only 5 anglers are actually fishing.
