TOTAL:							8	601	22	2	0	0	0	0								
<p>(1) Fishing is good in terms of numbers but not in size because headwaters water levels are still high. And, as such, we are forced to fish the mouth where water levels are lower, but there is, as always, excessive fishing pressure in this area. However, as expected this time of the year, rain has ceased and we will be moving to the head water where there is no fishing pressure.</p> <p>(2) Water levels are still high, however, here too rain has ceased in this region which is expected this time of the year</p>
